

How to Assemble: Small Speaker, without tape

1. Print parts
2. Tap holes in lower part (purple) with M3 tap, or use a screw to self-tap. The plastic should be soft enough to not need a tap.
3. Secure top part (green) to bottom (purple) with 3X M3 screw
4. Thread speaker wires through holes in bottom part
5. Place speaker into top part. Secure with glue if needed.
